Sunrise Tech IT Security Policy

1. Passwords and Access Control

Passwords must be at least 12 characters long and must be changed every 90 days. Sharing passwords with colleagues is strictly prohibited and may lead to disciplinary action.

Multi-factor authentication is mandatory for company email and the VPN. Access to production systems requires written approval from the IT head.

All system access is removed on the employee's last working day. Managers must raise an access removal request with IT at least three days before an employee leaves.

Sunrise Tech IT Security Policy

2. Devices and Data Protection

Every new employee receives a company laptop on the first day of joining. All company laptops use full-disk encryption, and the encryption must never be disabled.

Company data must not be copied to personal USB drives or personal cloud storage. Employees must use the approved company cloud drive for all work files.

Employees using public Wi-Fi must connect through the company VPN. Laptops lock automatically after 5 minutes of inactivity, and employees must lock the screen whenever they leave their desk.

Sunrise Tech IT Security Policy

3. Incident Reporting and Training

A lost or stolen laptop must be reported to the IT department within 24 hours. A suspected data breach must be reported to the security team immediately and no later than 1 hour after it is noticed.

Suspected phishing emails should be forwarded to security@sunrisetech.example and must not be opened or clicked.

Every employee must complete security awareness training within 30 days of joining and then once every 12 months.
